Education

Clark University, Worcester, Massachusetts, United States <i>PhD in Economics</i>	2026 (Expected)
Advisors: Junfu Zhang (Co-Chair), Kensuke Suzuki (Co-Chair), and Shihe Fu	
Clark University, Worcester, Massachusetts, United States <i>MA in Economics</i>	2023
Shanghai University, Shanghai, China <i>MA in Economics</i>	2021
Shanghai Ocean University, Shanghai, China <i>BA in Economics</i>	2018
University of Toronto, Toronto, Ontario, Canada <i>International Visiting Graduate Student</i>	2019-2020

Working Papers & Works in Progress

Trade Costs, Entry Costs, and Regional Economic Growth in China (Job Market Paper) [Download](#) 🔗

Joint with Kensuke Suzuki and Junfu Zhang

This paper examines sectoral growth patterns across Chinese provinces during the country's economic takeoff in the early 2000s, following major policy reforms including trade liberalization, infrastructure expansion, business climate improvements, and relaxed rural-to-urban migration restrictions. We develop a multi-sector, multi-region spatial general equilibrium model with heterogeneous firms *à la* **Melitz-Chaney** to analyze how these reforms interacted to shape regional economic growth. We quantify the model for the Chinese economy and conduct counterfactuals to identify the key mechanisms driving regional development. We find that reductions in trade costs and lowered entry barriers facilitate firm entry and intensify competition. Together, these factors shape regional specialization and China's overall economic growth. Our decomposition exercises reveal that lowered business entry costs played a larger role than the reduction in trade costs in promoting the growth of real wages, especially in inland provinces. This operates through a selection effect, where more productive firms expand and force the least productive ones to exit, and through increased variety, which effectively lowers the price index.

Aging Economy and Comparative Advantage: A Quantitative Analysis of Japan

Joint with Kensuke Suzuki and Junfu Zhang

This paper examines how an aging population reshapes comparative advantage, using Japan as an example. We propose that demographic change shifts comparative advantage toward experience-reliant sectors employing more older workers, causing significant structural transformation of the national economy. We construct a spatial general equilibrium model based on the **Krugman** framework, calibrated with detailed Japanese firm-level and task-level data, to identify which industries are more suitable for older workers and which regions are better positioned to expand in these elderly-intensive sectors. Counterfactual analysis shows that relaxing young worker immigration mitigates the decline of young-worker-intensive sectors, while encouraging elderly employment accelerates the shift toward elderly-oriented sectors. The model compares the relative effectiveness of these policies and examines how automation/AI can offset aging's economic effects, highlighting their impacts on welfare.

Economics), Urban Development Forum (Renmin University of China), Innovation Forum (Shandong University of Finance and Economics), National Development Youth Forum (Peking University)

Teaching

Teaching Assistant & Lab Instructor

Applied Game Theory (Undergraduate), supervised by Junfu Zhang (Clark University)	Spring 2026
Econometrics (Undergraduate), supervised by Moshi Alam (Clark University)	Fall 2025 & Spring 2025
Introduction to Statistical Analysis (Undergraduate), supervised by Moshi Alam (Clark University)	Fall 2024

Research Assistant

Research assistant to Junfu Zhang, David Cuberes, Jon Denton-Schneider, and Kensuke Suzuki (Clark University)	2021-2024
Research assistant to Qiangyuan Chen (Renmin University of China) and Yao Luo (University of Toronto)	2018-2021

Referee Services

International Studies of Economics (Frontiers of Economics in China)

Selected Awards & Grants

E. C. H. Veendorp Best Field Paper Award, Clark University	2024
Sheftel Travel Award, Clark University	2023 & 2025
National Scholarship, Ministry of Education of China	2019
Shanghai Municipal Scholarship, Shanghai Municipal Education Commission	2017
IER Project Research Grant (IERPK2527, PI: Motoaki Takahashi), Hitotsubashi University, Japan	2025-2026
NSFC Grant (72073093, PI: Qiangyuan Chen), National Natural Science Foundation of China	2021-2024
Shanghai Municipal Government Consulting Project Grant (2018-Z-D02, PI: Qiangyuan Chen), Pudong New Area Government, Shanghai	2018
